Grüne Woche
The global hub for agribusiness

Construction requirements for sales stands

Exhaust air systems:

- Suitable exhaust air systems for stoves, deep fryers, frying, baking and cooking areas etc. are required. Nuisance to neighboring exhibitors and guests due to smoke development must be avoided and entitles Messe Berlin to close the stand in the event of non-compliance.
  - The assembly, design and operation of such systems must be ordered in good time before the start of assembly in the web store. Coordination in advance with the exhibition technology: messetechnik@messeberlin.de

Floor coverings & surfaces:

- Wipe-down floor coverings (e.g., plastic sheeting) and washable wall coverings in the booths
- Washable display and sales surfaces (e.g., plastic sheeting) at least 60 cm above the floor

Refrigeration:

- Functional refrigeration facilities for perishable foodstuffs

Infection control:

- Effective spit and cough protection (e.g. Plexiglas screens or similar barriers)

Water supply:

- Hot and cold running water for cleaning dishes and glasses in double washers or dishwashers (or dishwashing boys - cold water only)
- Hand washing facilities with warm running water, liquid soap and disposable towels

Please note that liquid gas (propane gas) is not permitted on the exhibition grounds. See also Technical Guidelines, Section 5.5 "Compressed air/gas installations" and 5.7 "Use of compressed gases and flammable liquids." (Notification requirement)
